Web Developer | App Developer

Responsive Design | Code Debugging | Real-World Project Development

Motivated Web and App Developer with real-world project experience in full-stack PHP-MySQL web applications and Android development. Currently pursuing BCA (2023–26) from Allenhouse Business School, with a strong grasp of HTML, CSS, JavaScript, PHP, Java and MySQL. Experienced in building responsive UIs, backend logic, and CRUD-based dashboards. Passionate about writing clean code, solving real problems, and learning new technologies like React.js and Node.js. Eager to contribute to dynamic development teams and grow into a professional full-stack role.

SKILLS

- **Web Development:** HTML, CSS, JavaScript, PHP, Java, MySQL, Bootstrap, Responsive Web Design
- **Backend Development:** CRUD Operations, Form Handling, Basic Authentication Systems, Firebase Realtime Database
- **Debugging & Testing:** Console Debugging, Manual Testing, Code Troubleshooting
- **Tools & Platforms:** VS Code, Android Studio, Git & GitHub
- **Learning Familiarity:** React.js, Node.js
- **Soft Skills:** Time Management, Problem-Solving, Leadership, Clear Communication, Teamwork, Remote Collaboration

EDUCATION

- **Bachelors of Computer Application – 2023-2026**
  Allenhouse Business School - Kanpur, U.P.
- **Intermediate – 2023**
  High School – 2021
  Shubhash Smarak Inter College - Kanpur, U.P.

PROJECTS

Samridhi Book Dress   Dec 2024 – Mar 2025

Technologies: PHP, HTML, CSS, JavaScript, Bootstrap, MySQL
- Developed a responsive web application for managing school uniform orders with user login, order tracking, and inventory management.
- Enhanced user experience through clean UI design, efficient form handling, and code optimization.

E-Certification Management System   Apr 2025 – June 2025

Technologies: PHP, HTML, CSS, JavaScript, MySQL
- Built a web solution for designing, issuing, and verifying digital certificates with secure role-based access.

- Ensured responsive design and smooth user experience through backend logic, testing, and optimization.

HireEasy – Domestic Hiring Android App   June 2025 – Present

Technologies: Java, Firebase Realtime Database, Firebase Authentication, XML, Android Studio

- Developed an Android app to connect users with verified domestic workers, featuring role-based logins (Admin, Agent, User) with Firebase Authentication.
- Delivered clean UI/UX with responsive layouts, smooth navigation, and real-time data sync using Firebase.

CERTIFICATIONS

- Python Programming – Udemy
- Database Management Systems – NPTEL
- Continuously learning front-end frameworks like React and exploring Node.js for backend development.

ACTIVITIES & EXTRA-CURRICULAR ACTIVITIES

- Participated in Exuberance 2024.
- Volunteered in Turncoat event.
- Runner-up in Tech Debate competition.
- Participant in Inter-College Hackathon.
- Attended International Conference 2024.
- Participated in Exuberance 2025
